

Northland Healthcare Alliance

Northland Healthcare Alliance is mostly a Provider Based Network comprised of 24 Hospitals, Nursing Homes and a PACE Center. We have one large Tertiary Center 15 Critical Access Hospitals and 8 Long-term Care Facilities. We opened and operate the only PACE Program in North Dakota

We provide a wide range of services for our members and others as needed including Grants Development and Management, Mobile Imaging (MRI), Account Management (Collections), Infectious Waste Disposal, Group Purchasing of Services (Natural Gas, Anesthesia Equipment Maintenance, Insurance, Equipment Repair, and Others) We provide education including a wide range of Roundtables for discussion and program development. We operate a full-time PACE Program and are developing a state-wide HIT initiative to serve healthcare providers across the state. (mostly rural).

We are implementing a Supply Chain Materials Management System in two hospitals and would hope to expand to others in the near future. We own and operate a Medical Waste Processing Plant. Currently we have two large grant programs in operation, one to develop a Workplace Wellness Program in 10 communities and an HIT expansion Initiative.

We provide Medical Records Services and are involved in several equipment maintenance programs including the maintenance of all Sterilizer across the network and we have a BioMedical Equipment Repair and Maintenance program. For large capital equipment we have been involved with Thermo for many years.

We believe in collaboration and will work with any entity that makes sense. Currently two of our most successful programs include partners from the Montana Health Network and MediSota in Minnesota. We also work together with the State Department of Health and the Dept of Human Services and have written several proposal together.
